## **Agri-Fab Releases New Zero Turn Electric Spreader**

**Reliable and convenient electric spreader the perfect addition to zero turn mowers**

Sullivan, IL – Agri-Fab, Inc. is excited to present its new Zero Turn Electric Spreader (model #45-0627) to customers who want to get seed, fertilizer, and weed control spread quickly and easily. This electric spreader has a universal mount bracket to connect to the mower front axle. The design conveniently allows you to take the spreader on and off with minimal effort. This all-season spreader model fits many zero turn mower brands to help get lawns in tip-top shape in no time.

With a 12V sealed motor, the Zero Turn Electric Spreader provides reliable coverage of roughly ½ acre (25,000 sq. ft.) with up to a 12' spread width (depending on the material used and speed of application). The 125 lb. rustproof poly hopper and spreader plate help ensure product longevity not only in spreading lawn products but also when spreading rust-inducing salt during winter months. For added convenience and time savings, the cable flow control for the spreader's gate is accessible right from the driver's seat of the zero turn mower

“Spreading seed, fertilizer, weed control and salt has never been easier for homeowners with Agri-Fab’s new Zero Turn Electric Spreader,” said Hilary Conner, Vice President of Sales and Marketing for Agri-Fab. “After quickly hooking the spreader to a zero turn mower, homeowners can take care of their yards with speed and precision.”

See how the Zero Turn Electric Spreader can bring your yard to the next level; find this and all of our products at several online retailers or one of the many select Agri-Fab retail partners nationwide.
